

K59M Firmware / Application software Upgrade Guide

It's recommended to check for firmware upgrade for your keyboard before using it for the first time.

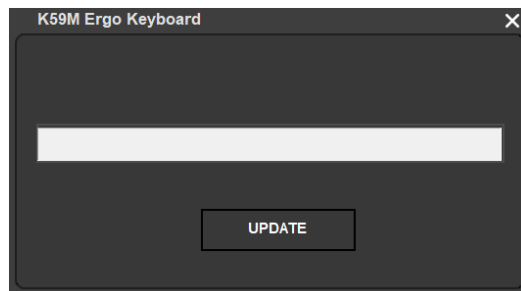

Changelog:

- Version: V1.17.0.0
- Fix the macro key setting bug

Upgrade Steps:

1. Connect your keyboard to your PC via USB cable
2. Run firmware upgrade application and click Start to begin upgrading.

DO NOT UNPLUG THE USB CABLE, TURN OFF OR RESTART YOUR PC WHILE UPGRADING.

3. Upgrade completed – you may now use your keyboard normally.
